The Vision is “Everyone Dances”. As we move through space in time, every day we dance. A studio experience at an early age can enrich and encourage the natural mover in all of us. Children are wonderously creative and movement and dance classes can help them with self expression, employing both the body and the mind. Self confidence is gained. As the young mover/dancer progresses, more technique is introduced based on the disciplines of Modern Dance; however, the creative elements are always present. It is the goal to serve both the young dancer with the hope of becoming a professional dancer and the young dancer who desires to improve her or his creativity by experiencing dance.

“It has been my mission for over thirty years to provide modern dance and movement classes to children with many moving on to professional careers in modern and ballet as well as other performing arts and all improving their self confidence and presentation skills. It is important that this dance experience begin with younger children. The classes are intended to introduce this American idiom as a positive art and movement experience and to provide a foundation for those who may have the goal of further pursuing dance education and training.” - Bonnie Boilini Baxter

Classes will be taught by Bonnie Boilini Baxter, Founder and Director Emeritus of Southold Dance Theater.
